Basic charge €/month	5.00	6.15
Service charge c/kWh	0.19	0.23
The price of Business Spot electric energy (c/kWh) for each delivery hour is in accordance with the spot electricity price that the Nord Pool Power Exchange has quoted for the Finnish price area.		

General electricity

General electricity is sold to new contract-based sites, where the size of the main fuse is max. 3 x 63 A and the annual consumption of electricity is less than 100,000 kWh.

Time-of-day electricity A

The daytime electricity unit charge shall be effective on weekdays, from Monday to Friday, 7 a.m.-8 p.m. except for public holidays. The night-time electricity unit charge shall be effective at other times, as well as on the eve of May 1st, Midsummer's Eve, Christmas Eve and New Year's Eve.

Time-of-day electricity A is sold to new contractbased sites, where the size of the main fuse is max. 3 x 80 A and the annual consumption of electricity is less than 100,000 kWh.

Business Teho

The daytime electricity unit charge shall be effective between 7 a.m. and 10 p.m. The night-time electricity unit charge shall be effective at other times of day. The winter months are November, December, January, February and March. All other months are considered summer months. The active power value to be invoiced shall be the highest average hourly power of the month, metered during the validity of the daytime electricity unit charge.

Business Vuosi

An annual charge is collected for each site with a connection power of 40 W or part thereof. If the connection power in question is not used around the clock, but its control follows, e.g., the use of the public outdoor lighting systems in Helsinki, the connection power to be used as an invoice basis may be lowered in proportion to the reduced time of use. This type of pricing can be used for sites, where the metering of electricity cannot reasonably be arranged. Technical etc. changes affecting invoice bases shall always be agreed upon with Helsingin Energia.

More than one site to which electricity is supplied may be recorded under a contract based on the Business Vuosi pricing, in which case the impact of the basic charge is not multiplied.

Business Spot

A service charge is collected for all electricity supplied to the customer. If the consumption of electricity is not metered and registered by the hour, the monthly price of electricity is calculated using the type-load curve for group 3 specified in decision No. 491 of the Ministry of Trade and Industry.

Other terms and conditions

The products are optional for customers encompassed by Helsingin Energia obligation to deliver, subject to the restrictions stated in the price list. The place of electricity use shall have metering equipment suitable for using the product.

* The prices including value added tax (23%) have been rounded to two decimal places.
