

Effective as of 1.7.2011

## Electricity distribution tariffs

	VAT 0%	23%
<b>General distribution tariff</b>		
Basic charge €/month	3.74	4.60
Distribution c/kWh	3.11	3.83
<b>Time-of-day distribution tariff</b>		
Basic charge €/month		
main fuse under 100 A	13.33	16.40
main fuse 100 - 125 A**	52.00	63.96
main fuse 160 - 200 A**	115.00	141.45
over 200 A **	176.00	216.48
Daytime distribution c/kWh	2.88	3.54
Night-time distribution c/kWh	1.89	2.32
<b>Low-voltage power distribution tariff</b>		
Basic charge €/month	26.00	31.98
Power charge €/kW, month	3.45	4.24
Reactive power charge €/kvar, month	1.99	2.45
Daytime distribution c/kWh	1.39	1.71
Night-time distribution c/kWh	1.25	1.54
<b>Medium-voltage power distribution tariff</b>		
Basic charge €/month	175.00	215.25
Power charge €/kW, month	2.60	3.20
Reactive power charge €/kvar, month	1.99	2.45
Daytime distribution c/kWh	1.03	1.27
Night-time distribution c/kWh	0.88	1.08
<b>Annual distribution tariff</b>		
Annual charge €/40 W, year	15.95	19.62
<b>Time-of-day distribution tariff with controlled night-time load (not optional)</b>		
Basic charge €/month	13.33	16.40
Contracted power charge €/kW, year	7.62	9.37
Daytime distribution c/kWh	2.90	3.57
Night-time distribution c/kWh	1.11	1.37
<b>Electricity tax</b>		
	VAT 0%	23%
Tax class I, c/kWh	1.703	2.09469
Tax class II, c/kWh	0.703	0.86469

Electricity tax is levied on all electric energy distributed to customers through the distribution network. The excise tax on electricity and strategic stockpile fee are included in the electricity tax charge.

Electricity consumption sites used for production purposes or professional greenhouse cultivation may register for electricity tax class II. Application forms can be ordered from Helsingin Energia's Customer Service. For further information on the electricity tax, please contact the Southern Customs District of Finnish Customs/Excise taxes.

### General distribution tariff

For new contracts, the size of the main fuse may not exceed 3 x 63 A, if electricity consumption is over 5,000 kWh/a.

### Time-of-day distribution tariff

The daytime distribution is valid on weekdays, from Monday to Friday, from 7 a.m. to 8 p.m. The night-time distribution is valid at other times, as well as on the eve of May 1st, Midsummer's Eve, Christmas Eve and New Year's Eve. The time-of-day distribution tariff is available for new contract sites where the size of the main fuse is max. 3 x 80 A.

### Low- and medium-voltage power distribution tariffs

The daytime distribution is valid from 7 a.m. to 10 p.m. The night-time distribution is valid at other times. The power charge invoiced is the highest average hourly demand of the month, metered during the validity of the daytime distribution. The reactive power charge invoiced is the highest reactive power metered during the month, from which either 40% of the highest active power metered during the same month, or at least 50 kvar, has been deducted. The medium-voltage power distribution tariff is available for the 10 kV and 20 kV voltage levels.

### Annual distribution tariff

An annual charge is collected for each site with a connection power of 40 W or part thereof. If the connection power in question is not used around the clock, but its control follows, e.g., the use of the public outdoor lighting systems in Helsinki, the connection power used as an invoice basis may be lowered in proportion to the reduced time of use. The annual distribution product is intended for consumption sites where the metering of electricity cannot reasonably be arranged. In addition to annual transmission, electricity tax is also charged. This is determined on the basis of electrical energy consumed at an output of 40 W.

### Time-of-day distribution tariff with controlled night-time load (not optional)

The daytime distribution is valid on weekdays, from Monday to Saturday, from 7 a.m. to 9 p.m. The night-time distribution is valid at other times. The time-of-day distribution tariff with controlled night-time load requires a control system for load approved by Helen Sähköverkko Oy. Helen Sähköverkko Oy controls the load according to the heat requirement. Helen Sähköverkko Oy may restrict the option to use the time-of-day distribution tariff with controlled night-time load for reasons of loading.

### Other terms and conditions

The products are optional for customers in the area of Helen Sähköverkko Oy's distribution network, subject to the restrictions mentioned in the price list.

\* The tariffs including value added tax have been rounded to two decimal places.

\*\* No new customers.
