

Effective as of 1.7.2011

Price list for event-related electrical connections

| | VAT 0 % | VAT 23 % |
|--|---------|----------|
| Commissioning and installation of distribution board € | 410,00 | 504,30 |
| Rental for the distribution board €/month | 150,00 | 184,50 |

The commissioning and installation of the distribution board includes transport of a distribution board equipped with a meter to the place of event, installation, and collection after the event.

The monthly rental for the board will be charged as a daily fee calculated for the days when the distribution board has been in use by the customer.

Event-related electricity is supplied to events lasting for a maximum of 6 months. If electricity is required for a longer period than 6 months, or the main fuse size is in excess of 63 A, the customer must place an order for a temporary connection contract.

The implementation of the connection contract must be agreed on with the connection service of Helen Sähköverkko Oy well in advance of the required start of use. Orders received within less than three days are delivered if the contractor's work situation permits. There is an additional express delivery charge of EUR 201.64/connection (incl. VAT 23%). The availability of event-related electrical connections is not guaranteed at all locations in the Helsinki region.

An event-related electrical connection includes 3 m of connection cable and a distribution board equipped with a meter. The board has 3 single-phase plug points and 3 x 16 A, 3 x 32 A and 3 x 63 A power sockets. The customer is responsible for the distribution board during the event. No changes can be made to the board, and the boards must not be moved. The customer is responsible for keeping the board locked during the event. The customer will be charged for a broken distribution board.
